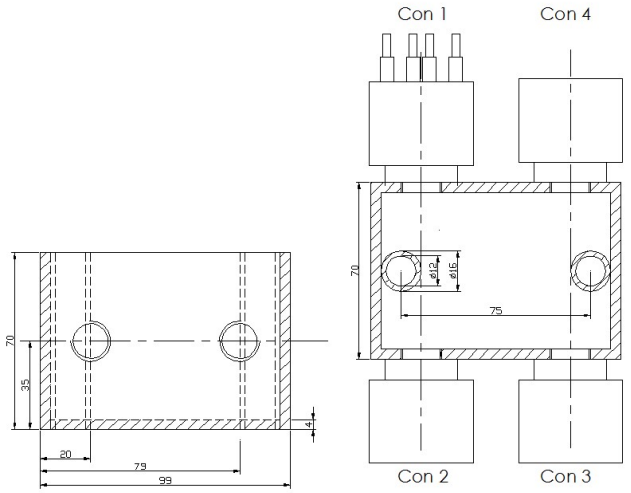
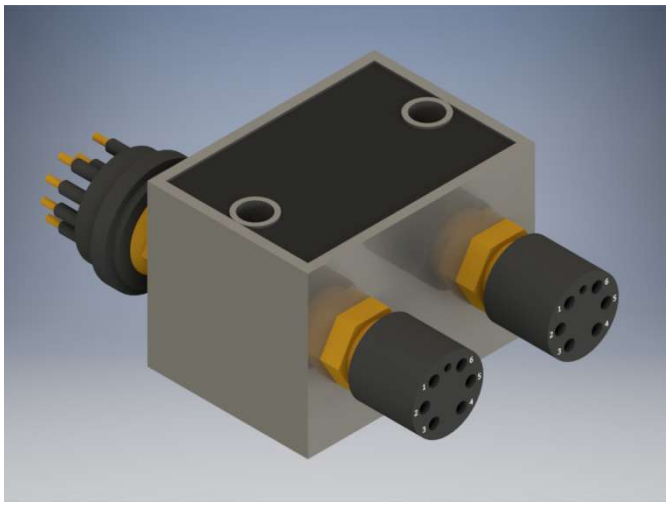
Junction Box.

[underwater usage]

MSA-S-B-0007.

- Developed a special watertight, stainless steel housing.
- Is suitable for use to a depth of 500 m.
- Junction boxes can also be made according to customer's specification.
- The watertight, electrical connections are low budget connectors.

This junction box is equipped with 1 x 12p male and 2 or 3 x 6p female connector.




Above junction boxes are used:
On board all types of dredgers for electrical connections.
